Instant

Product

The new iWhite Instant is a professional teeth whitening kit for instant results. The product contains a new, revolutionary whitening gel which has been clinically proven safe and instantly effective. You will see an immediate effect after the first application! This innovative, one step system will also actively remove stains and strengthen your teeth. It's easy to wear and to use. The product is composed of 10 thin and flexible trays to ensure a comfortable fit and maximum performance. No need to clean or boil mouthpieces, mess with syringes or brushes, measure gel or use special toothpastes or rinses. The iWhite Instant whitening trays are one-size-fits-all and are individually packed. This at home treatment should be worn only 20 minutes a day for instant results up to 8 shades whiter. The product can be used for 5 consecutive days for even more astonishing results or you can use it once in a while whenever you feel it is necessary.

Technology

The iWhite Instant new formula is clinically proven to be safe and instantly effective. The product is based on a unique Film-crystallized Calcium technology which provides an instant whitening effect, actively removes stains and remineralizes the teeth at the same time.

The white crystals used in combination with strong film forming polymeric agents will physically fix the crystals on the targeted teeth surface which will lead to an optical whitening effect. iWhite Instant also contains Phthalimido Peroxycaproic acid (PAP). This is a unique patented ingredient which targets and dissolves the unnatural double bonds which cause the dental discoloration, without affecting the dental structure.

The whitening trays are manufactured with soft transparent material to improve the flexibility of the mouthpiece. Thanks to this, the pressure gradient, which is one of the most important catalyzing parameters of the whitening reaction, is optimized and pushes the active gel on the teeth surface for maximum whitening results. The tray is designed to whiten both the front and the back of the teeth. This is important because teeth are translucent and stains on the back can show through the front.

Features

- Clinically proven INSTANT whitening results
- Up to 8 shades whiter
- 100% SAFE and hydrogen peroxide free
- Active stain remover
- Strengthens the teeth
- Easy: one step system, prefilled, no mixing
- Comfortable: soft transparent trays for a custom fit teeth whitening, one-size-fits-all
